<p>Location</p> <p>Lovelady, Texas</p>	
<p>Ship Date</p> <p>March 27th, 2018</p>	
<p>Summary</p> <p>A new customer in East Texas contacted us with high CO₂ and rich gas in a newly drilled well. TransTex provided multiple turnkey solutions for equipment, installation and operations to treat and process 12 MMSCFD of natural gas.</p> <p>This job is a full scale operation utilizing an amine plant , a dehydration unit, along with a JT skid to strip the NGL'S, and bullet tanks to store the natural gas liquids.</p> <p>The increase in NGL pricing is starting to pay off. It allows for a revenue stream from selling the liquids that essentially pays for the amine plant lease. A win for both the customer, and TransTex Treating!</p>
