Equipment

- 7 GPM Pneumatic Amine Plant
- 10 3/4" High Pressure Contact Tower
- Filter and Overhead Separator

Location Hallettsville, Lavaca County, TX

Delivery Date June 5th, 2017

### Summary

Just outside of Hallettsville, TX, our customer had a well with CO<sub>2</sub> measured at 3.4%; their goal was to flow at less than 2%. Thanks to readily available equipment and a dedicated team, TransTex was able to meet the challenge. The amine plant was installed, commissioned, and treating our client's gas flow within 10 days of contract execution. This is a notable timeframe compared to industry averages for an amine plant installation.
